

Lexmark Legal Partner

Turn your Lexmark multifunction printer into a one-touch workflow solution

Law offices require robust technology that can quickly produce large volumes of high-quality hard copy documents, while boosting productivity and simplifying print management for client charge-back. The Lexmark Legal Partner is a software bundle for Lexmark multifunction printers (MFPs) customized specifically for the legal industry. It delivers the workflow and cost recovery functionality today's law firms demand.

A versatile, hard-working partner for busy law offices

Transform your Lexmark MFP into a Legal Partner to simplify your law office's workflow processes. Custom functions are all easily accessed through icons on the MFP's user-friendly e-Task touch screen, allowing attorneys and administrative staff to complete complicated workflow processes with a single touch – and without special training. In addition to robust copy, scan, and fax capabilities, your Lexmark Legal Partner is Copittrak capable, making it easy to integrate with your existing Copittrak client billing software.

SOLUTION SUMMARY

Lexmark Legal Partner applications simplify law office workflow processes by making tasks accessible with just one touch.

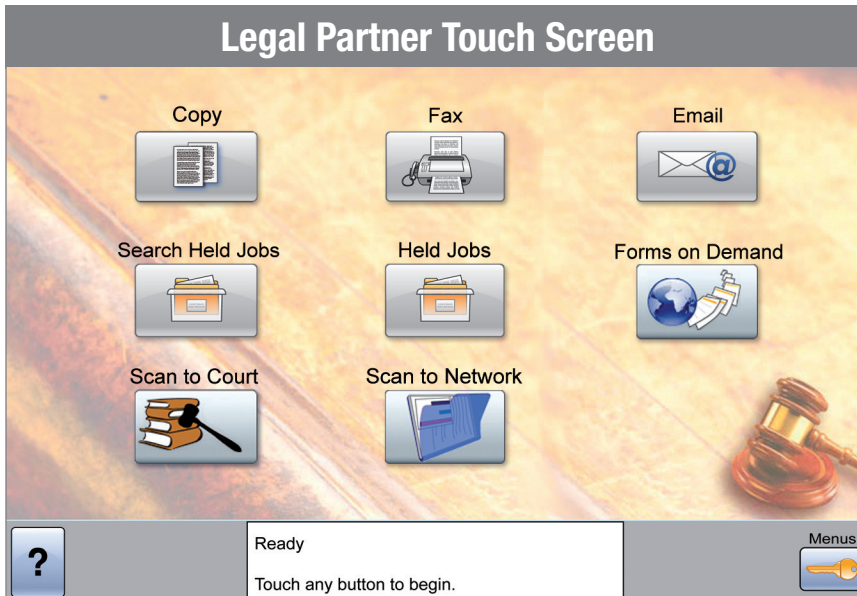

Forms on Demand lets users print electronic documents they've saved as bookmarks on the MFP.

Scan to Court lets you set file limits for scanned jobs destined for court delivery. It also gives you the option of automatically separating over-limit files into several smaller files to meet the court's requirements.

Scan to Network allows users to quickly scan documents to custom locations on the network (including user home directories), capturing, profiling, indexing and storing the files with one touch of the icon.

Copittrak-Capable right out of the box, Lexmark Legal Partner enables the immediate integration of Copittrak automated client billing software (purchase of a Copittrak license required).

Custom Screensaver lets you feature your law firm's logo as the operator panel background or as a screensaver, enhancing your firm's image and professionalism.

Immediate access to a suite of powerful law office workflow solutions

Thanks to Lexmark's Embedded Solutions Framework, which allows Java-based law office applications to run directly on Lexmark MFPs, your law office won't have to install additional servers to enjoy these time-saving solutions:

Forms on Demand

Legal and administrative staff are often too busy to log in to a workstation every time they need to locate a document and print it. Forms on Demand allows them to quickly and easily access and print forms at the Legal Partner MFP.

- Easy to set up and configure from the MFP operator panel.
- Allows you to add descriptive names to Internet or intranet URLs.
- Reduces cost of printing and storing preprinted forms, in addition to eliminating waste associated with obsolete forms.

Scan to Court

Since many courts limit the size of electronic files they will accept, this application allows law firms to set file limits for scanned jobs destined for court delivery. If a job exceeds the limit, the MFP will either stop the scan job and allow the user to adjust the scan settings, or automatically separate it into several smaller files so that the document can be sent in segments that meet the court's requirements.

Scan to Network

This application allows users to quickly scan documents to custom locations on their network. Lawyers can also scan documents directly to their personal folders on the network to maintain confidentiality or to departmental folders to enhance collaboration.

Copitrak-Capable

The Lexmark Legal Partner is Copitrak-capable, enabling the immediate integration of Copitrak automated client billing software after the purchase of a Copitrak license. Firms can realize all of the productivity-boosting features of the MFP without sacrificing revenue streams from tracked copies and scans.

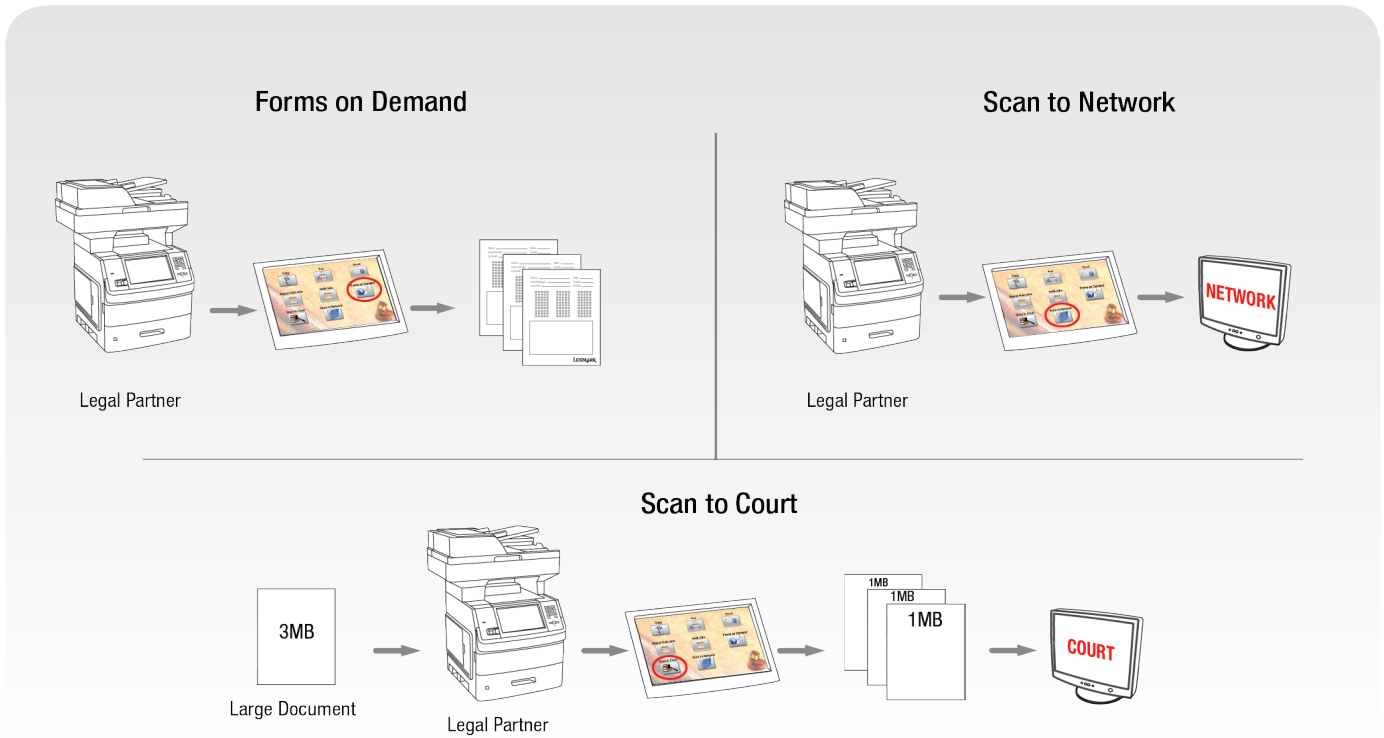

- Track scans (e-mail and FTP), copies and faxes directly from the MFP touch screen.
- Track impressions quickly and efficiently by utilizing familiar Copitrak features like Last Job Recall and Favorites.

Custom Screensaver

The touch screen can be customized with your law firm's logo, viewed on the operator panel background or as a screen saver when the MFP is not in use. This can enhance your firm's image and professionalism, especially if the MFP is located in an area that is visible to clients.

Put a Lexmark Legal Partner on staff in your law office

By seamlessly integrating the versatility and one-touch ease of use of Lexmark MFP technology with a suite of powerful law office workflow solutions, Lexmark can help your firm streamline processes, improve productivity and track costs more accurately. To put a Legal Partner MFP to work in your law office, contact your Lexmark representative today.

Productivity at your fingertips

Easy-to-use Lexmark multifunction printers with big, colorful touch screens can help you manage all of your documents more effectively. Put powerful, proven output features to work with just a touch.

- **Intuitive Interface** – Customizable, vivid icons on the Lexmark color e-Task touch screen provide fast access to print, copy, fax and scan to e-mail functions or custom workflows.
- **Scan Preview** – This feature lets you view the first page of a scanned document before you send it to ensure accuracy.
- **Job Build** – When scanning pages from both the automatic document feeder (ADF) and the flatbed, the entire job can be saved as a single file.
- **Priority Copy (Job Interrupt)** – For convenience copying, this feature allows you to temporarily interrupt a print job, then resume it once the copy is made.
- **Mixed Original Sensing** – When you need to place documents of mixed sizes in the ADF, this feature ensures that the appropriate paper size is selected during the copy process.
- **Job Cancel** – This intuitive feature clearly lists all jobs in each queue (print, copy, fax) to ensure the correct job is cancelled.
- **Direct USB Scanning/Printing** – Print image files directly from a USB flash drive, or scan documents and save them as pdf, tif or jpeg files on a USB flash drive.

Security Standard

You've invested a great deal in securing your networked PCs and servers, so why not secure your printers and MFPs? All high-function network devices should be protected against attack and configured to support your network security policies. Lexmark MFPs and printers support best industry practices for network, device and document protection.

- **Confidential Print** – Keeps print jobs secure until the intended recipient enters an authorized PIN number.
- **Operator Panel Lock** – Locks the device's operator panel, entirely or to administrators only. Requires a PIN number to unlock it.
- **TCP Connection Filtering** – Configures the device to allow TCP/IP connections only from a specified list of TCP/IP addresses.
- **Hard Disk Encryption** – Encrypts all data on the device's hard disk using a 128-bit AES key.
- **MFP Lockout** – Disables the touch screen and securely stores all incoming print and fax jobs on the device's hard disk until it is unlocked by entering the authorized PIN.
- **SNMPv3** – Lexmark MFPs support SNMPv3, including authentication and data encryption, to allow secure remote management of the devices.
- **IPSec** – All network traffic to and from printers and MFPs is encrypted and authenticated.
- **Secure User Authentication** – MFP functions can be restricted so that users must authenticate prior to performing copy, scan to e-mail, scan to fax, scan to network, workflow scripts or embedded applications.
- **Secure LDAP over SSL** – Information exchanged via LDAP, including user credentials, names, e-mail addresses and fax numbers, is encrypted to preserve the confidentiality and privacy of data.

One-Touch Wonders

Lexmark's award-winning touch screen MFPs give you one-touch access to all of your critical document functions in one high-performance device, saving you time, money and office space. But that's not all they can do. When combined with Lexmark software solutions, they can make your print and imaging tasks more efficient.

Lexmark and its partners offer more than 100 ready-made solutions for improving processes and workflow efficiency. We can also tailor solutions to help solve your unique document challenges. To learn more, contact a Lexmark representative or visit www.lexmark.com.

Lexmark Solutions are supported on many Lexmark products, including:

Monochrome Laser MFP

- Lexmark X460 Series*
- Lexmark X650 Series
- Lexmark X850 Series

Color Laser MFP

- Lexmark X730 Series
- Lexmark X940 Series

* Requires 256MB memory
